

The Parent Mentors of Medina County and Brunswick City Schools are hosting

A Virtual Training for Parents and Families on how to access
resources available from

OCALI Family and Community Outreach Center

“The Family and Community Outreach Center equips and empowers families with knowledge, information, and resources. We believe that families are an important asset in the equation of ensuring people with disabilities have the opportunity to live their best lives. We strive to build families’ confidence and encourage a vision for the possibilities and opportunities for their whole family. To do this, we offer online tools, connect families to information and resources, and raise awareness and acceptance within the community.”

Presenter: **Jen Bavy**

Jen is the Program Director of the Family and Community Outreach Center at OCALI
